

Dr. Kathleen Klaper is a biologist. Between 2017 and 2021 she completed her doctoral thesis at the RKI at the department of infectious diseases. She then worked as a research associate in the “Integrated Molecular Surveillance for SARS-CoV-2” network from 2021 to 2022, where she developed expertise in genome sequencing technics. Currently, Dr. Kathleen Klaper works as a research associate, where she focuses on the surveillance of sexually transmitted bacterial pathogens (STI) and HIV. Her passion for public health research and understanding of the evolution of antimicrobial resistance drives her work in this field.
