

Pille Konno

Estonia

Dr Pille Konno has graduated from the University of Tartu, Faculty of Medicine (1994) and residency in dermatovenerology at the University of Tartu (2000). Currently in addition to clinical work, she is doing research, as part of Doctorate studies, in the field of melanoma diagnostics, at the University of Tartu. The doctor has received additional training in Germany at the Charite Clinic in Berlin, the St. Joseph Clinic in Bochum, in Hamburg and in Rome, Italy, at the Tor Vergata University. Dermatovenerology deals with problems of the skin, nails, as well as hair, regardless of age or gender. Early diagnosis of melanoma and non-melanoma skin cancer is extremely important! Pille believes that correctly timed diagnostics and adequate cure will ensure beautiful, healthy skin and a better quality of life. The best curative results are always achieved in cooperation with the patient.
